Robert Schrieffer. In addition to his Nobel Prize-winning work in superconductivity, Prof Schrieffer has made significant contributions to a wide variety of topics in condensed matter physics. These include the theory of soliton excitations in polyacetylene (a clear example of spin – charge separation in a condensed matter system), paramagnon theory, magnetic impurities, the physics of surfaces, high-T<sub>c</sub> superconductivity, and the fractional quantum Hall effect. The papers are reviewed and placed in context by leading experts. The guest contributors are A Alexandrov (on electrons and phonons), T Einstein (on surfaces,) S Kivelson (on quantum Hall effect), D Scalapino (on the BCS theory of superconductivity), F Wilczek (on solitons and fractional quantum numbers), J W Wilkins (on magnetic impurities) and S C Zhang (on high-T<sub>c</sub> superconductivity).

outstanding particle theorists of our time. This volume consists of about 40 papers which made fundamental contributions to our understanding of particle physics during the last few decades. The unpublished lecture note on string theory (1969) and the first paper on spontaneous symmetry breaking (1961) are retyped and included. The book also contains a memoir of Prof Nambu on his research career. Contents:

Nambu's ideas, as well as his charming modesty, become evident and make reading this collection the pleasure that it is. ”

Physics Today “ In the citation of Nobel physics prize committee, Nambu's unpublished paper presented at Mid West Conference at Purdue University in 1960 is referred to as the original article on spontaneously broken symmetry. This is the paper which we have decided to include in the volume ‘ Broken Symmetry ’ because of its historical importance. The paper would have been inaccessible and may not have been noticed by the general public if it were not retyped and included in the volume. ” T Eguchi and K Nishijima

particle theory from 1950 onward. The order of the papers within the various sections is chronological and reflects the development of the fields during the second half of this century. In some cases, Thirring returned to problems decades later when the tools for their solution had ripened. Each section contains introductory comments by Thirring, outlining his motivation for the work at that time. Features: A complete proof of the divergence of the renormalized perturbation theory in a relativistic quantum field theory and a proof of the divergence of a similar theory A proof of the stability of matter An analysis of a dynamical system with negative specific heat A generalization of the dynamical entropy to quantum dynamical systems

emerging democracies, such as Bangladesh, a redefinition of roles and responsibilities of different actors in the policy and governing process can be noticed. This book identifies and analyses issues related to the making and implementation of public policies in Bangladesh over the last four decades (1972-2012). It explores the implications of the change that has taken place in policy and governance environment in Bangladesh. Focusing on several important sectoral and sub-sectoral policies, it examines the impact and limitations of the change. Chapters are structured into four parts: Public Policy, Bureaucracy and Parliament; Cases of Public Policy; Women in Governance and Public Administration; Ethics, Innovations, and Public Service Delivery, and the book is a valuable resource for researchers in the field of development studies, public policy and South Asian politics.

Understanding Clinical Papers is a popular and well established introduction to reading clinical papers. It unravels the process of evidence-based practice, using real papers to illustrate how to understand and evaluate published research, and it goes on to provide explanations of important research-related topics.

These research papers also cover a spectrum of innovative technical solutions, including computer-controlled mining equipment, remote monitoring of air quality, and virtual reality training systems.
