Diabetes: Epidemiology, Pathophysiology and Clinical Management aims to be the one-stop diabetes book for researchers, scientists and clinicians. It details the epidemiology, causes, molecular mechanisms, molecular markers, available drugs, experimental drugs, treatment modalities, and dietary and lifestyle approaches related to diabetes. It focuses on various molecular aspects of diabetes, and its related co-morbidities. Apart from the drug-based treatment approach based on international guidelines, this book also describes various surgical treatments available for cases of uncontrolled symptomatic diabetes. It also lays emphasis on the future possibilities of different approaches for diabetes management. Key Features Includes treatment guidelines and approaches to diabetes provided by major global diabetes associations Provides a thorough and comprehensive assimilation of detailed information and updates in the field of diabetes, helpful for researchers, scientists and clinicians Contains a chapter on anti-diabetic drugs, that covers both the commercially approved drugs as well as those that are in various phases of experimental, pre-clinical, and clinical trials

This unique Training Turnout program is the second resource in our Training Turnout series, and is a great follow on from our Tips for Turnout Program. It deeps the exploration of the anatomy of the dancers' hip in an easy to understand way, and explores the differences in training turnout in multiple different positions. Discover the maximal potential for your hips without pain or strain!- Learn how to assess and understand the structure of your own hips including what are true restrictions and what can be improved on- Discover your deep turnout muscles and how to train each of them for ultimate control in all positions- Recognise the relationship between core stability and turnout range and control- Learn modified physiotherapy release techniques to improve range in second splits- Find out how to effectively improve stability of the hips and pelvis while maintaining full range- Strengthen standing leg turnout control in a progressive sequence of exercises- Learn how to control turnout en fondu for optimal leg alignment during jumps- Condition the hamstrings for their essential role in supporting the led in retire- Specifically train the deep hip flexors for their very important role of supporting the leg during adage- Develop extraordinary control in a la seconde without irritating the front of the hips- Demystify the secrets of a beautiful arabesque line by addressing each component separately

KLR650 (2008-2012),

Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as 'naturalism'. Naturalism, in this context, denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on 'scientific' naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians and intellectually curious people in general.

As the costs associated with buying and owning collectible American and European motorcycles continue to rise, enthusiasts are turning in greater numbers to motorcycles produced by Japanese manufacturers from the 1960s to the early 1980s. The prolific production of Japanese motorcycles during this period today translates to consumer-friendly market values for collectors. This buyer's guide divides the world of classic Japanese motorcycles by the four major manufacturers -- Honda, Kawasaki, Yamaha, and Suzuki -- while emphasizing such landmark models as the Kawasaki Z-1 and Honda CB750, and featuring a chapter of less common models from secondary marques like Bridgestone. Photographs of the motorcycles are accompanied by complete descriptions of specification, components, paint codes, and serial numbers. A five-star rating system grades the bikes on collectibility, parts availability, two-up touring, reliability, and power, while the author highlights common repair and restoration needs, and suggests sources for collectible models.

SEO For 2011 contains strategies for 2011 to help you optimize your website and dominate the world's leading search engines. The Internet is now the telephone book. So as a business you have to adapt and not only adapt well, you have to do one better than your competitors so your name comes up at the top of the list on any keyword search. This is the only guide you need to place your website at the top of the major search engines in 2011! (Includes

complete coverage of Google Caffeine, Google Instant, and the latest in search engine optimization.)

James Toseland is one of the hottest properties in motorsport. Two times World Superbike Champion, James is ready to take on the best riders in the world in his first season in MotoGP. As the only British rider in the 2008 competition, the country's hopes rest firmly on James' shoulders. James gives a unique insight into what it's like to compete at the very top level. What are his hopes and fears as he enters his first season? What does he think about the competition, including current champion Casey Stoner and the legendary Valentino Rossi? And what's it really like being part of the MotoGP circus, with sponsorship commitments and international travel, not to mention the 'bikes and birds' lifestyle? Packed with stunning photographs from every race of the season, as well as events off the track, James' account gives an honest picture of the highs, lows and inevitable crashes of a season in MotoGP.
