Heart-lung
transplants are
only recommended
after very careful
consideration and
an in-depth
assessment. The
assessment will be

Access Free Heart And Lung

Transplantation
done at your
nearest transplant
centre. The aim of
the assessment is
to build a detailed
picture of your
current health and
to check for
underlying
problems that
could make you
unsuitable for a
transplant. You'll
have several tests,

Access Free Heart And Lung

Transplantation
which may include
blood tests, urine
tests, blood
pressure tests, lung
and heart function
tests, X-rays and
scans.

A heart-lung
transplant is a

Access Free Heart And Lung

Transplantation
procedure carried
out to replace both
heart and lungs in
a single operation.

Due to a shortage
of suitable donors
and due to the fact
that both heart and
lung have to be
transplanted
together, it is a
rare procedure;
only about a
hundred such
