At the heart of every bee hive is a queen bee. Since her well-being is linked to the well-being of the entire colony, the ability to find her among the residents of the hive is an essential beekeeping skill. In *QueenSpotting*, experienced beekeeper and professional “swarm catcher” Hilary Kearney challenges readers to “spot the queen” with 48 fold-out visual puzzles — vivid up-close photos of the queen hidden among her many subjects. *QueenSpotting* celebrates the unique, fascinating life of the queen bee chronicles of royal hive happenings such as The Virgin Death Match, The Nuptial Flight — when the queen mates with a cloud of male drones high in the air — and the dramatic Exodus of the Swarm from the hive. Readers will thrill at Kearney's adventures in capturing these swarms from the strange places they settle, including a Jet Ski, a couch, a speed boat, and an owl's nesting box. Fascinating, fun, and instructive, backyard beekeepers and nature lovers alike will find reason to return to the pages again and again.
