There are many kinds of storms, and they can be scary, but this overview helps readers understand how and why they happen—and shows the importance of weather in different parts of the world and out-of-this world on other planets!

Looks at all the big storms created by Mother Nature run amuk—from lightning and thunder to monsoons, hurricanes, and tornadoes. Features superlatives, jokes, and best of all, the incredible photographs available only from National Geographic.

Storms are SCARY! But it's cool to understand what's going on when Mother Nature gets angry. Why does the wind howl? Why does it rain for days? How do rivers overflow? Thunder and lightening, monsoons, hurricanes, tornadoes... the facts and photos in this book will blow you away! From the Trade Paperback edition.

National Geographic Primary Readers is a high-interest series of beginning reading books that have been developed in consultation with education experts. The books pair magnificent National Geographic photographs with lively text by skilled children's book authors across four reading levels. Level 2: Becoming fluent (These books are a good match for kids who are developing reading stamina and enjoy a longer book. They are ideal for readers of Green, Orange and Turquoise books. Storms are SCARY! But it's cool to understand what's going on when Mother Nature gets angry. Why does the wind howl? Why does it rain for days? How do rivers overflow? Thunder and lightening, monsoons, hurricanes, tornadoes... the facts and photos in this level 2 book will blow kids away!

Explores the causes of everyday weather phenomena, including how clouds form, why tornadoes twist, and how the sun helps life grow.

Presents information about tornadoes and the damage that they can cause, with facts, scientific explanations, photographs, first-person accounts, and historical reports of deadly tornadoes.

Filled with fun facts and amazing photographs, an in-depth look at amazing weather includes real-life encounters as documented by National Geographic tornado chaser, Tim Samaras. Simultaneous.

Photographs and text introduce different kinds of volcanoes, where they are located, how and why they erupt, and other interesting data about volcanoes.

Describes the science behind dangerous, wild, and deadly weather, including heat waves, blizzards, thunderstorms, floods, and hurricanes, and explains what can be done about the current extreme weather conditions on the planet.

Describes mummies, both natural and man-made.
