'The intention of this work is to show that European expansion not only transformed the historical trajectory of non-European societies but also reconstituted the historical accounts of these societies before European intervention. It asserts that anthropology must pay more attention to history.' (AMAZON)

Explores the full range of Eric R. Wolf's methods and concepts and pays tribute to his work in anthropology and history.

This text explores the historical relationship of ideas, power and culture. Looking at several case studies, it analyses how the regnant ideology intertwines with power around the pivotal relationships that govern social labour.

A study of two small villages located on the high alpine rim of northern Italy, one German speaking, the other a Romance -speaking village.

With the originality and energy that have marked his earlier works, Eric Wolf now explores the historical relationship of ideas, power, and culture. Responding to anthropology's long reliance on a concept of culture that takes little account of power, Wolf argues that power is crucial in shaping the circumstances of cultural production. Responding to social-science notions of ideology that incorporate power but disregard the ways ideas respond to cultural promptings, he demonstrates how power and ideas connect through the medium of culture. Wolf advances his argument by examining three very different societies, each remarkable for its flamboyant ideological expressions: the Kwakiutl Indians of the Northwest Pacific Coast, the Aztecs of pre-Hispanic Mexico, and National Socialist Germany. Tracing the history of each case, he shows how these societies faced tensions posed by ecological, social, political, or psychological crises, prompting ideological responses that drew on distinctive, historically rooted cultural understandings. In each case study, Wolf analyzes how the regnant ideology intertwines with power around the pivotal relationships that govern social labor. Anyone interested in the history of anthropology or in how the social sciences make comparisons will want to join Wolf in *Envisioning Power*.

"Peasant Wars of the Twentieth Century provides a good short course in the major popular revolutions of our century--in Russia, Mexico, China, Algeria, Cuba, and Viet Nam--not from the perspective of governments or parties or leaders, but from the perspective of the peasant peoples whose lives and ways of living were destroyed by the depredations of the imperial powers, including American imperial power."-New York Times Book Review "Eric Wolf's study of the six great peasant-based revolutions of the century demonstrates a mastery of his field and the methods required to negotiate it that evokes respect and admiration. In six crisp essays, and a brilliant conclusion, he extends our

understanding of the nature of peasant reactions to social change appreciably by his skill in isolating and analyzing those factors, which, by a magnification of the anthropologist's techniques, can be shown to be crucial in linking local grievances and protest to larger movements of political transformation."--American Political Science Review "An intellectual tour de force."--Comparative Politics

This award-winning classic in the study of ethnicity, identity, and nation-building has a new introduction (on which Eric Wolf collaborated near the end of his life) that shows the continuing validity of the book's innovative approach to ethnography, ecology, culture, and politics. The authors investigated two Alpine villages—the German-speaking community of St. Felix and Romance-speaking Tret—only a mile apart in the same mountain valley.
