This book constitutes the thoroughly refereed post-proceedings of the 10th International Conference on Computer Supported Cooperative Work in Design, CSCWD 2006, held in Nanjing, China in May 2006. Among topics covered are CSCW techniques and methods, collaborative design, collaborative manufacturing and enterprise collaboration, Web services, knowledge management, security and privacy in CSCW systems, workflow management, and e-learning.

I Am We is a two-way book of twenty short stories, split into 10 pairs, wherein each half of a pair is presented on either half of the book. Each title has a corresponding mate on the other side. The reader is therefore presented with ten individual stories, which are told in two entirely different ways. One half of the book represents the individual, and paints its stories within a surreal dreamscape, while the other half of the book symbolizes the collective and presents its stories in hard reality. From birth to friendship, love, ambition, prejudice, spirituality and the afterlife, I Am We traces the journey an individual takes in life, and contrasts it through the twin perspectives of fantasy and reality.

The author provides a practical, step-by-step approach in teaching how to use the IBM J2EE server side development tool called WebSphere Studio Application Developer (WSAD) for developing J2EE distributed applications.

Write, adapt, deploy, and debug powerful and robust applications with help from this comprehensive resource. Learn how JSPs integrate with Enterprise JavaBeans and JDBC, and how they communicate with other Web components, including Perl, CGI, servlets, and applets. Well-suited for both experienced JSP developers and those new to JSP technology, this book is an ideal reference.

This book contributes the thoroughly refereed post-proceedings of the 5th International Conference on Web-Based Learning, ICWL 2006, held in Penang, Malaysia in July 2006. The 31 revised full papers cover such topics as personalization in e-learning, designs, model and framework of e-learning systems, implementations and evaluations of e-learning systems, learning resource deployment, organization and management, and tools in e-learning.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Get comprehensive coverage of J2EE in this all-inclusive resource. Organized by component type, this is the most complete guide on the market and addresses J2EE 's massive collection of APIs. Fully up-to-date and containing J2EE best practices -- plus coverage of Java databases, Java interconnectivity, and Web services, this is ideal for every developer working with J2EE.

This book constitutes the refereed proceedings of the 5th Asia-Pacific Web Conference, APWeb 2003, held in Xian, China in April 2003. The 39 revised full papers and 16 short papers presented together with two invited papers were carefully reviewed and selected from a total of 136 submissions. The papers are organized in topical sections on XML and database design; efficient XML data management; XML transformation; Web mining; Web clustering, ranking, and profiling; payment and security; Web application architectures; advanced applications; Web multimedia; network protocols; workflow management systems; advanced search; and data allocation and replication.

The Internet Encyclopedia in a 3-volume reference work on the internet as a business tool, IT platform, and communications and commerce medium.
