This is the only authoritative textbook on metabolic measurement of animals, ranging in mass from fruit flies to whales. It integrates a rigorous theoretical background with detailed practical guidelines for making actual measurements in the field and laboratory.

A practical, up-to-date handbook presenting the essential principles, design methods, examples, useful data, and guides to more information on air pollution and its control. Comprehensive in scope, it will aid engineers in the design of cost-effective air pollution control systems. Contributors provide a clear account of what can be done to solve a problem, and what the limitations are.

Automotive Automatic Transmission and Transaxles, published as part of the CDX Master Automotive Technician Series, provides students with an in-depth introduction to diagnosing, repairing, and rebuilding transmissions of all types. Utilizing a " strategy-based diagnostics " approach, this book helps students master technical trouble-shooting in order to address the problem correctly on the first attempt.
