Shape Wordle. We present a new technique that enables people to create shape-bounded Wordle, fitting text into a given shape. To guide the word placement within a shape, we devise shape-aware Archimedean spirals by extending traditional Archimedean spirals with the distance field of the shape. To handle a non-convex shape, we introduce a multi-centers Wordle layout by segmenting the shape into multiple regions and then applying our shape-aware spirals to generate Wordle for each region.
